SPR November Full Page Ad

Hi Jerome & Glenda,

The next SPR ad will be regarding the SPR Physician Scientist Award: Bridging to Success. It could be similar to what you did in the attached ad regarding the SPR award in honor of E Mead Johnson.

Attached is the previous awardee's pic. Her title is as follows:

Sagori Mukhopadhyay, MD, MMSc  
Assistant Professor of Pediatrics, Children's Hospital of Philadelphia and Pennsylvania Hospital  
Perelman School of Medicine at the University of Pennsylvania

Below is information on the award.

### **Society for Pediatric Research Physician Scientist Award: Bridging to Success**

The mission of SPR is to create a network of multidisciplinary researchers to improve child health. Implicit in our mission is our foundational commitment to supporting the success of young investigators in child health research through activities that include facilitation of connection with peers, potential collaborators and national mentors. Last year the SPR started a new program to add to their portfolio to achieve this goal.

The SPR Pediatric Research Physician Scientist Award supports transitioning pediatric physician scientists who have submitted a K08 or K23 award, which although not funded, may be potentially competitive on resubmission to the NIH.

The support mechanism is a salary award for \$40,000 to the sponsoring institution with no indirect costs. The sponsoring institution and Department must match the \$40,000 to constitute \$80,000 salary support for one year. At least 75% protected research effort must be assured. Additional fringe should be covered by the institution from separate sources.

Applications now being accepted.

**Glenda:** Feel free to add specifics or your recommendations.

Let me know if you need additional information.

I'd like to have the final copy by **September 11**.

Bridging to Success

Previous awardee

**Sagori Mukhopadhyay**  
MD, MMSc

Assistant Professor of Pediatrics, Children's Hospital of Philadelphia and Pennsylvania Hospital  
Perelman School of Medicine at the University of Pennsylvania

The mission of SPOR is to create a network of multidisciplinary researchers to improve child health. Implicit in our mission is our foundational commitment to supporting the success of young investigators in child health research through activities that include facilitation of connection with peers, potential collaborators and national mentors. Last year the SPOR started a new program to add to their portfolio to achieve this goal.

The SPOR Pediatric Research Physician Scientist Award supports transitioning pediatric physician scientists who

have submitted a K08 or K23 award, which although not funded, may be potentially competitive on resubmission to the NIH.

The support mechanism is a salary award for \$40,000 to the sponsoring institution with no indirect costs. The sponsoring institution and Department must match the \$40,000 to constitute \$80,000 salary support for one year. At least 75% protected research effort must be assured. Additional fringe should be covered by the institution from separate sources.

We encourage nominations of pediatric research accomplishments that extend beyond the laboratory with outstanding scientific merit and the potential to advance the field of pediatric research and its legacy.

The Award is directed at pediatric researchers who are currently in training or who are under 40 years of age. Award winners are under 40 years of age. Award winners are under 40 years of age. Award winners are under 40 years of age.

## Bridging to Success

### Pediatric Research Physician Scientist Award

---

2017 Recipient

**Sagori  
Mukhopadhyay**  
MD, MMSc

Assistant Professor of Pediatrics, Children's Hospital of  
Philadelphia and Pennsylvania Hospital  
Perelman School of Medicine at the University of  
Pennsylvania

As SPR continues its focus on the success of young investigators who conduct outstanding scientific research, we are pleased to announce the 2nd annual Pediatric Research Physician Scientist Award Nominations are open!

The SPR Pediatric Research Physician Scientist Award supports transitioning pediatric physician scientists who have submitted a K08 or K23

award. The award winner will be supported with a \$40,000 salary + a \$40,000 matching of funds from the sponsoring institution. Please visit the SPR website for more award details and qualifications.

SPR wants to help you build your bridge to success!

We encourage nominations of young pediatric researchers with outstanding scientific accomplishments and a vision for advancing child health.

The Award is directed exclusively by SPR.
